

## Version 1.3.0

03/30/2026

### New features

- When transferring a new Firmware or Bootloader, if a communication interruption occurs, it is possible to resume the transfer from the point where it stopped. Requires Firmware version 2.0.13.

## Version 1.2.0

03/23/2026

### New features

- Dives can be sorted in ascending or descending order for the Date/Time, Duration, and Depth columns. Click the header of the column you want to sort.

Dive Id	Date/Time	Duration	Depth
<b>Azoth Systems - 0014001B-33305003-20353153 - 10 dives</b>			
3	04/10/2020 01:43:05	16:55	4.0m
2	04/10/2020 01:43:10	16:50	6.9m
4	04/10/2020 02:02:19	04:00	20.0m
0	17/12/2025 18:36:29	10:30	33.1m
5	24/02/2026 10:44:21	04:00	20.0m
8	27/02/2026 09:36:46	08:30	43.0m

- Only dives that are not already in the database are offered for import from the Odyssey. Requires firmware 2.0.12

## Version 1.1.0

03/09/2026

### New features

- Support for the new Odyssey firmware 2.0.11
- Added gas type in the gas list
- Added gas markers on the dive profile
- Added temperature display on the dive profile
- Added maximum depth on the dive profile

- Added ceiling zone display on the dive profile graph
- Added alert display on the dive profile graph and in the summary
- The dive profile graph can now be displayed in maximized mode
- Added information fields: Water type, Surface pressure, GFs
- Added editable user information: Location, Site, Buddy
- The dive computer serial number and owner are now displayed in the dive import dialog
- When connecting to an Odyssey, if a newer firmware is available, an information message is shown
- If a new version of Odyssey DiveLog is available, the user is prompted to download and install it
- Added system log retrieval function for sending diagnostic information to Azoth Systems

## Bugs

- Fixed incorrect retrieval of the gas index from the Odyssey
- Fixed retrieval of alerts from the Odyssey

## Version 1.0.2

02/06/2026

- First public version.
